

Institut Pasteur

28. RUE DU D^R ROUX . PARIS XV^e

TEL: SÉCUR 01-10

PARIS, le 5th of May.

[1964]

Dear Josh.

I send you just these few words because I am a little amused about my subscription to the Journal of Immunology.

Did you receive my letter with the check enclosed? If not, would you be kind to tell me because I don't know yet if the Treasurer of the American Association of Immunologists has received my fee for 1964 and if it is the reason why I do not receive the J. of Immunology any more?

Could you tell me, also, if you received the catalogs of the main French scientific publishers? If you can find scientific books from this country don't hesitate to tell me.

How is your political situation developing? We have been afraid, a week ago, of your president and herons of State decorations and relieved now that the bluff is over. ~~But~~ Was it pure bluff or a real determination counterbalanced by public opinion in the States and the reaction of England? What about Mac Carthy's circus? Does his popularity increase or decrease?

I have not much to tell you about France, though, historically, an attitude should be determinant now, as Indochina seems to be the turning point of Cold War, but we still are in a position of colonial servility towards the U.S., not by necessity but by a strange attitude of pathological absence of will.

Are you not finally planning to visit us. We are all waiting for you.

Give my love to Esther
Yours as ever

Ami [Bussard]
